

# Study Pack - ISMN XL and Cilostazol

Participant ID:

--	--	--	--	--	--	--	--	--

This pack is designed to help you take your **CVD-Cog tablets**.

- The CVD-Cog study is testing two medications called:
  - **Cilostazol** and **Isosorbide Mononitrate (ISMN)**
- You have been randomly allocated to take:

**Isosorbide Mononitrate XL** and **Cilostazol**

**START DATE:**

- The dose of tablets you are taking will increase for the first few weeks, until the full dose is reached, providing you are not getting any side-effects.
- Take tablets **30 minutes** before meals with a glass of water.
- The table below provides details of which tablets you should take and when.

WEEK	ISMN XL		CILOSTAZOL	
	MORNING	EVENING	MORNING	EVENING
<b>WEEK 1-2</b> Date _____ to _____				
<b>WEEK 3-4</b> Date _____ to _____				
<b>WEEK 5-25</b> Date _____ to _____				
<b>PLEASE NOTE: Medication will be reduced gradually at the end of the study</b>				
WEEK	MORNING	EVENING	MORNING	EVENING
<b>WEEK 26</b> Date _____ to _____				
<b>WEEK 27</b> Date _____ to _____				

You will be followed up by **two teams**.

Your **local hospital** team will:

# Study Pack - ISMN XL and Cilostazol

Participant ID:

--	--	--	--	--	--	--	--	--

- Call you **at least twice** during your first month of treatment and once after 6 months of taking the treatment to:

- Check new symptoms or problems that you have noticed.

- Discuss how your study drug treatment is progressing.

Drug treatment will continue for **6 months**.

- The **Nottingham central** team will be checking new symptoms or problems that you have noticed and asking some questions at the **6-month** telephone follow up.

- **Please return** any **unused** tablets in their packs to the **community** or **hospital** pharmacy,
- Keep old unused tablets in a separate bag with a note: *"Do not take it. Return to the pharmacy"*.

## Additional Instructions

- If you see your doctor, please tell them that you are taking part in the CVD-Cog study.
  - Especially if you are prescribed new drugs
