

Pharyngeal Electrical stimulation for Acute Stroke dysphagia Trial

PhEAST

Recruitment Update - 49 Participants, 15 open sites!

PhEAST Recruitment (31.03.2023)

Well done to all our 3 recruiting sites in March, and to our newly opened sites, Salford Royal, Dorset County Hospital and University Hospital Llandough!

NOTICE

The recruitment rate has dropped over the last few months despite the widening of the inclusion criteria and the addition of 3 new sites. Please screen daily and keep an eye on any patients who may become eligible for the trial. Our stop-go decision is in June; please make every effort to increase recruitment locally. If you have any queries regarding eligibility, contact the trial office by phone who will be happy to assist you.

Reminders

WPDS / FAQs / Trial Manual

The trial working practice documents, FAQs and manual are all really useful tools that can assist with anything from screening to follow ups, and can be found on the trial website (address below)
