Pharyngeal Electrical stimulation for Acute Stroke dysphagia Trial

PhEAST

Milestone Update

Well done to all our recruiting sites in May, and our newly opened site Edinburgh!

65 participants and 16 open sites!

Meet the team!

I joined the University of Nottingham as a Trial Coordinator in March 2021 and I currently work on the following trials within the Stroke Trials Unit in Nottingham: PhEAST, TICH-3, ENOS-2 and RECAST-3. I have recently joined the PhEAST team, my main role being assisting trial manager Gemma in setting up new sites ready for recruitment. I am finding it really interesting to be involved in a trial investigating an exciting potential treatment for dysphagia, and I really enjoy being part of the wider team and supporting the important work being undertaken in the department.

Emily Stanyard Trial Coordinator

ESOC 2023

We had a great time presenting PhEAST at ESOC 2023 - it was great to see some of you there! Special congratulations to Professor Philip Bath for winning the ESO Presedential Award!

Investigator Meetings

A special thank you to Lisa Everton, Deborah Broadbent and Claire Rae who recently presented at our latest investigator meeting: PhEAST, Dysphagia Rehabilitation & Pharyngeal Electrical Stimulation

If you missed the meeting and would like to view the recording please contact the trial team

Pharyngeal Electrical stimulation for Acute Stroke dysphagia Trial

PhEAST

FAQs

Q: Can participants who are awaiting VFS / FEES to assess swallow be entered into the trial?

A: If you are able to make a clinical diagnosis of dysphagia then yes. If you need to await VFS / FEES to get a diagnosis of dysphagia then please await the results of these before entering into the trial.

Q: What constitutes a FOIS score of 2?

A: FOIS of 2 is up to and including 15 teaspoons of food / drink per day. FOIS 3 is still NG dependent, but above 15 teaspoons a day. Please see the trial manual for further guidance.

Q: Can you provide advice on how to keep the trial catheters in?

A: Please consider using a bridle or mitts (with correct DOLs in place) if you think a patient may pull them out.

Q: How do I upload documents to the secure vault?

A: Access supporting site from the left hand side of Redcap, you can then upload documents for each participant.

Please see the Document Upload WPD for more assistance on this. Consent forms must be uploaded within 24 hours of consent for the central trial team to review.

Best Practice Tips

- Attempt recruitment into PhEAST as early as possible, so that participants are not discharged or moved to
 another hospital before the 14 day follow up.
- Ask ward nurses and Drs to attend the catheter portion of the Phagenyx device training this will come in handy if they are inserting catheters for you!
- Get in touch with the trial team if you think you could benefit with additional training we're more than happy to help.
 - Consider the use of bridles for those who are pulling out multiple NG tubes.

Upcoming Events

PhEAST - Investigator Meeting - Tuesday 20th June 2023 12.30pm -1.30pm BST

Amendments:

SA/07/23

Approved 25/04/2023

FOIS 3 to be included for entirety of enrolment window (days 4-31), use of independent physician consent allowed (if there is no NoK)
