SMALL HAEMATOMA VOLUMES

We remind sites to estimate haematoma volume before enrolment, targeting patients most likely to benefit from haemostatic therapies.

Whilst we specifically exclude patients with massive haematoma, we do not have a formal cut-off for minimal haematoma volume. A number of participants with very small haematoma (< 1ml), have turned out not to have ICH. If unsure, please check with the radiologist or treating physician to confirm that the patient has ICH and would benefit from a treatment aimed at preventing haematoma expansion.

Congratulations on the recent TICH-3 recruitment!

STREAMLINED RECRUITMENT

Remote consent - As a reminder consent can be taken virtually by a delegated member of research team (code J) via telephone or telemedicine – so it is possible to enrol patients if you are not on site. This is then document in the patients' medical notes.

Eligibility checklist and enrolment form [Eligibility checklist and enrolment form TICH-3 Final v1.1 25.04.2024.docx](#)

– this is to be used ONLY when a delegated team member to take enrolment consent is not available, this form documents consent and enrolment completed by a member of the clinical team who is not on the delegation log.

Ward staff can help facilitate enrolment for the TICH-3 trial information for the trial can be found here [Click here for ward staff guidance](#)

Welcome to the TICH-3 trial!

ALIVE AND WELL CHECKS ASSISTANCE

Thank you very much to everyone for helping our follow-up coordinators complete alive and well checks when we are unable to contact their GP. This is a really important step to make sure we are not causing any undue upset to families of the participants if it is no longer appropriate to contact them for the 6 month follow up.

KEEPING IN TOUCH AND UPDATE MEETINGS

We would like to invite you all to join the TICH-3 trial team where we will discuss topics of interest for the trial:
