**TRANEXAMIC ACID
FOR INTRACEREBRAL
HAEMORRHAGE:
TICH-3 TRIAL**

**STUDY WITHIN A
TRIAL – (SWAT)**

Professor Nikola Sprigg

On behalf TICH-3 Trial Team

Final v1.0 27/04/2022

**SWAT TRAINING IS ONLY FOR UK
SITES THAT HAVE BEEN
RANDOMISED INTO ENHANCED
CONSENT PROCESS (ANIMATED
VIDEO)**

SWAT Sub-study

Aim: To reduce inequalities in enrolling participants from minority communities.

Population: All individuals recruited to the TICH-3 trial in the UK.

Intervention: Animated participant video

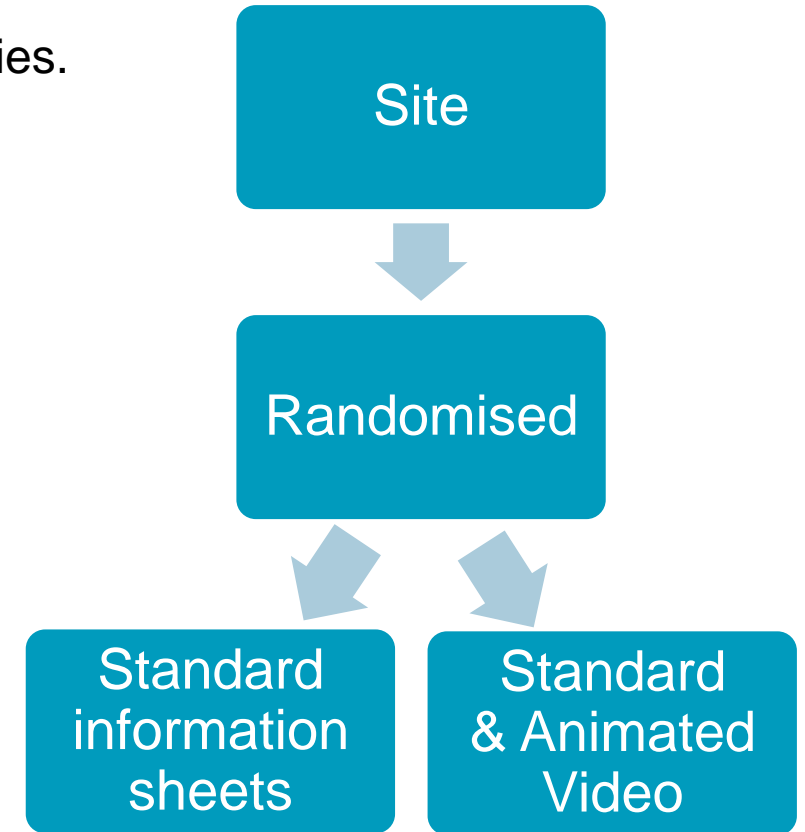

Control: Standard information sheets

Outcome measures:

1. Proportion providing consent for follow up:
 - i. In the TICH-3 UK study population as a whole
 - ii. By minority ethnicity group versus non- minority ethnicity
 - iii. Follow up completion rates in the control and intervention groups.

Design: Cluster randomisation at site level

Sites will be informed of their randomisation prior to initiation and Sites will be given training on how to use the video if randomised to animated video

Note: Animated video will be used **in addition** to the standard consent process and information sheets. Given the age and recent stroke, the intervention **may improve understanding of all participants** not just those in minority ethnicity groups, we will therefore **include all UK participants** rather than the sub-set from minority ethnicity communities in the SWAT.

Ethical approval for SWAT

- SA_02_22

SWAT video completed and transcript uploaded for ethical approval. Day 180 form typo amended.

Submitted – 21/02/2022

Approved – REC and HRA 31/03/2022

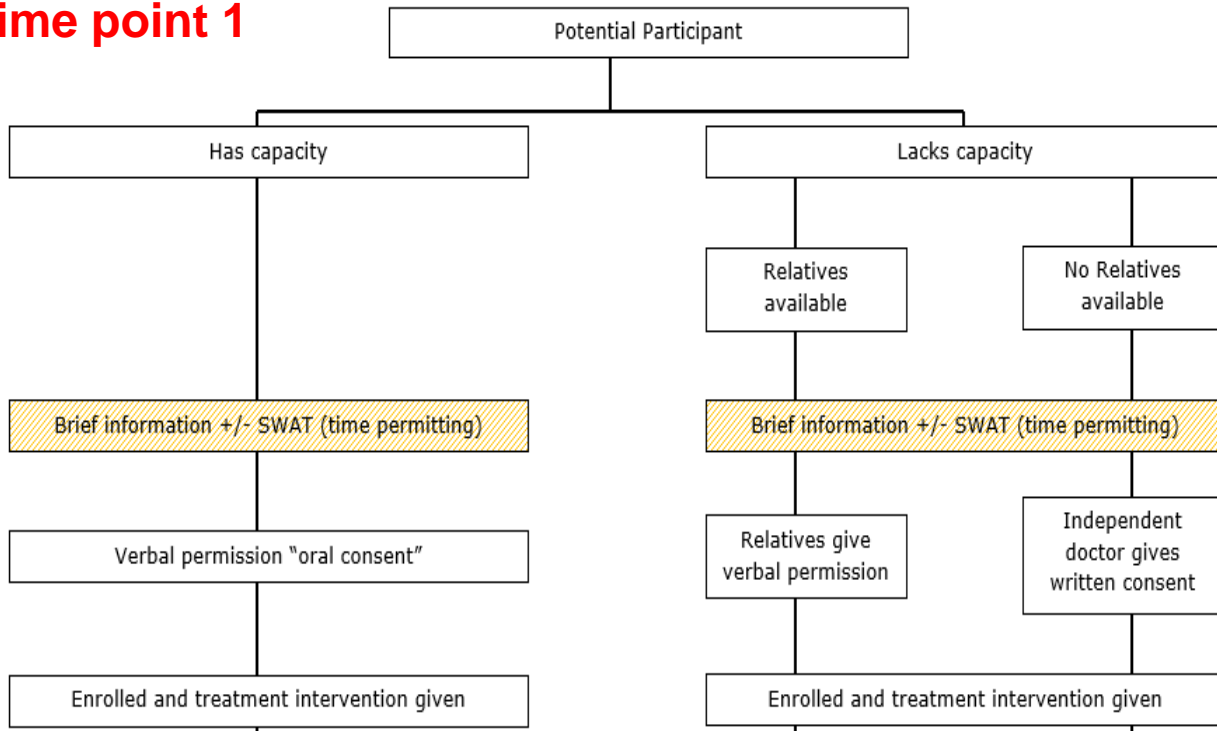

We now have full ethical approval to use the animated SWAT videos.

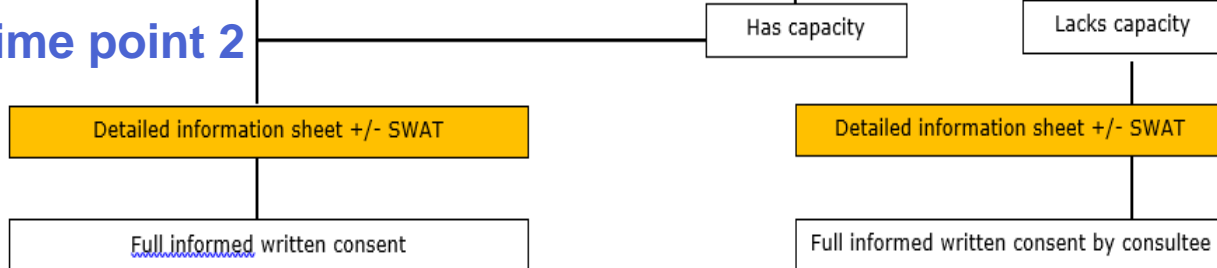

SWAT Consent Process

Time point 1

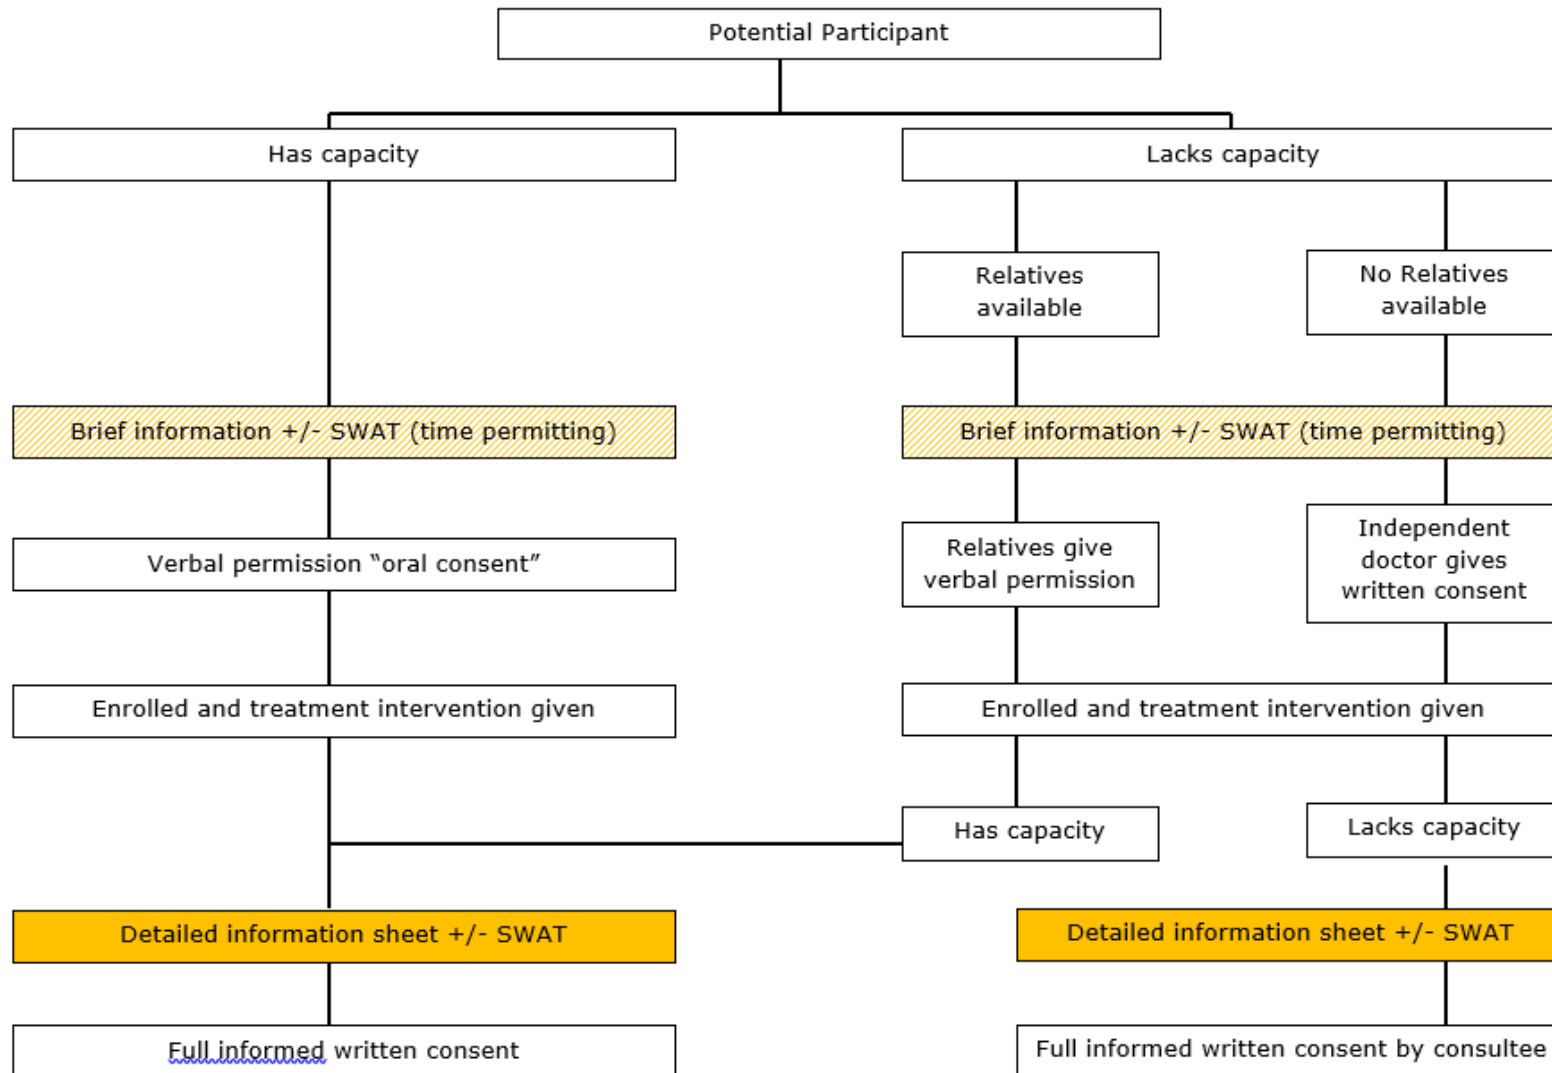

Time point 2

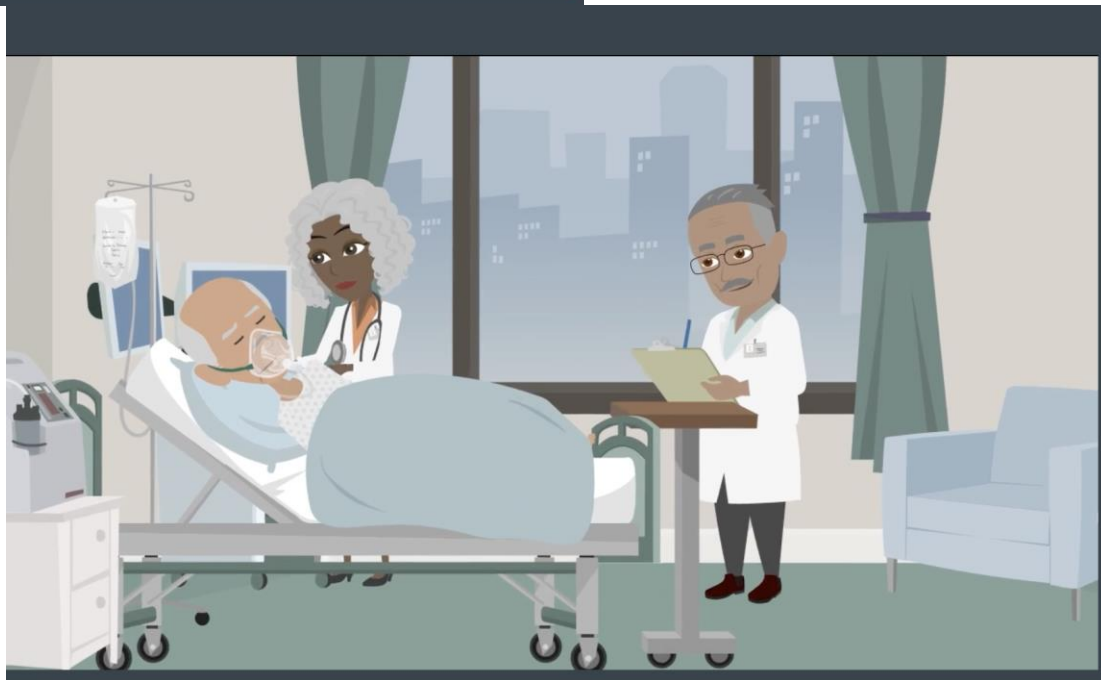

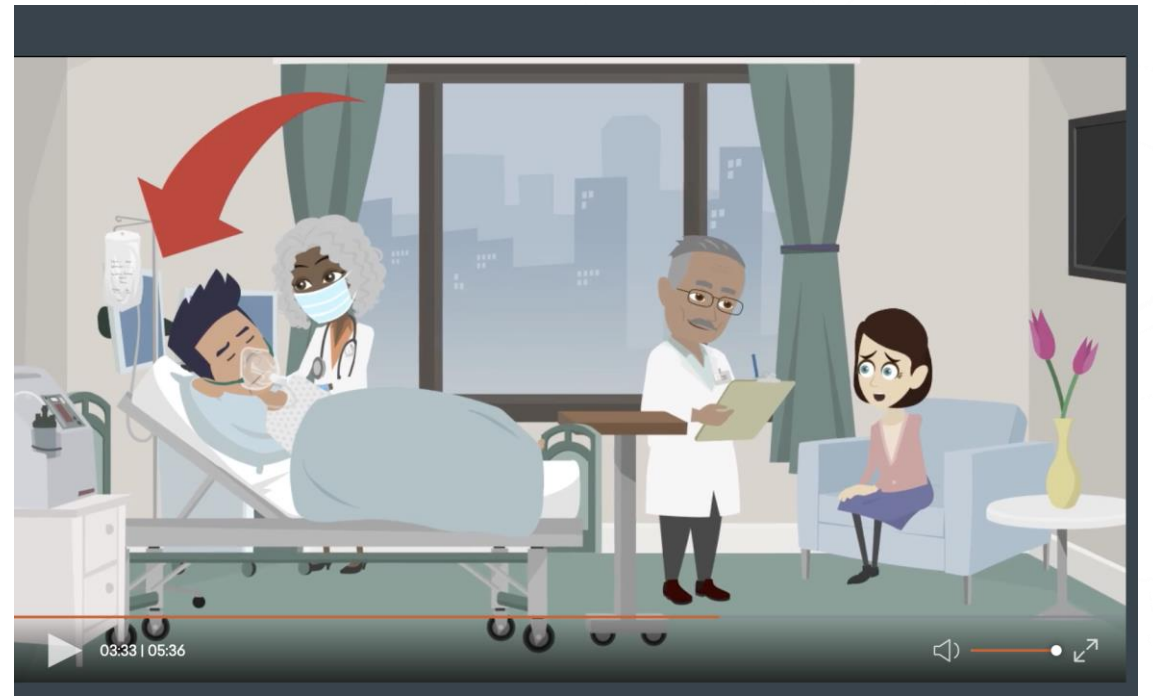

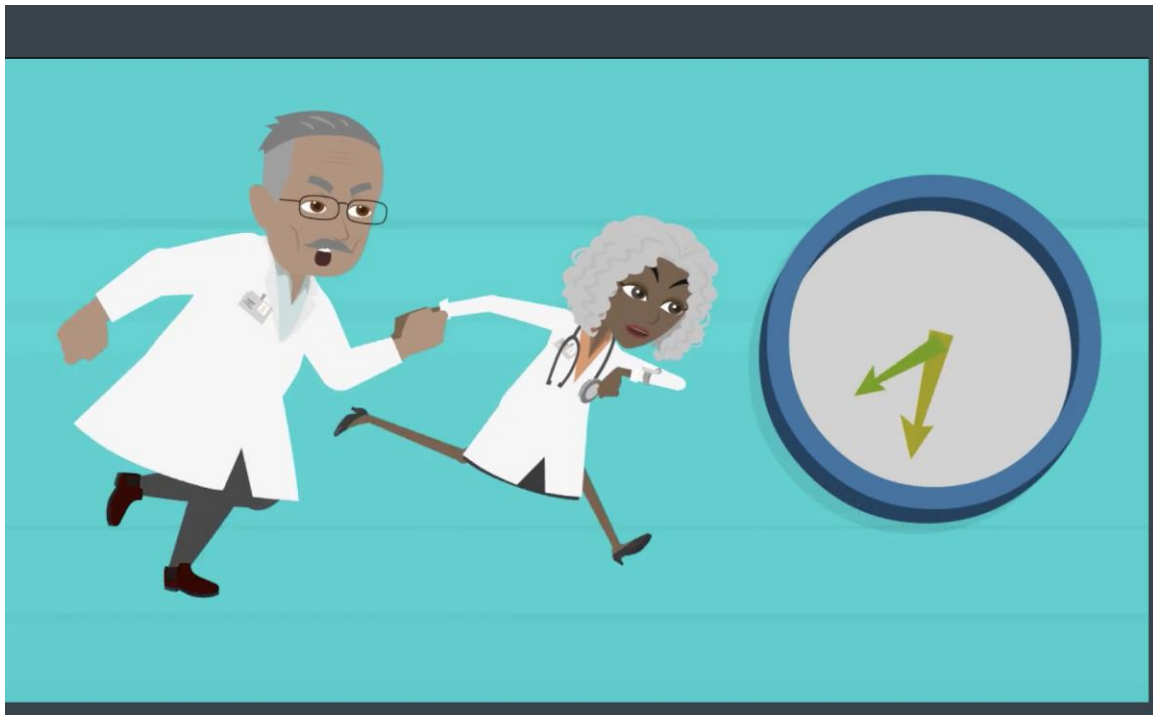

- We anticipate that the SWAT animated video will be mostly used for obtaining follow on written consent, time point 2.
- If time allows, the SWAT animated video can be used when obtaining oral enrolment consent, time point 1.

SWAT Consent Process Flowchart

- All participants give follow on written consent.
- Sites randomised to the enhanced process will have access to the website with the video in 5 languages.
- On day 7 the eCRF will capture if the video was used.
- The database will also record when the video is accessed.

Translated versions of SWAT videos:

- 4 languages available in addition to English - Bengali Polish Punjabi and Urdu
- For foreign languages - video has text in English but the audio has been translated into the above languages
- Please use the video for ALL patients – irrespective of language/ethnicity - the intervention **may improve understanding of all participants** not just those in minority ethnicity groups, we will therefore **include all UK participants** in the SWAT.

Obtaining site specific access to videos

TICH-3 log-in only required first time to obtain link

1. Login into to TICH-3 and click on consent video section in contents list
(Anyone with a TICH-3 investigator account at your site will have access to the link)
2. Get site specific link to consent videos
3. Bookmark this link – it can be used in future without logging in
4. The site specific link can be shared with colleagues at your site – or relatives of patients at your site, no log in is required

TICH-3 trial Tranexamic acid for IntraCerebral Haemorrhage 3

ISRCTN 97695350

Room S/D2123, Stroke Trials Unit
School of Medicine, University of Nottingham
Queen's Medical Centre, Derby Road
Nottingham NG7 2UH, United Kingdom
TICH-3 trial office <tich-3@nottingham.ac.uk>

Day 7 follow-up form v1.0

Section I: SWAT video

Only UK sites randomised to the SWAT active group should answer this section. If you are entering data for any other site, please answer 'Not applicable'.

I1	Was the participant/relative shown the animated participant video?	[Select...]	[Select...]
I2	If yes, which language was used?	[Select...]	[Select...]
I3	If yes, who watched the video?	[Select...]	[Select...]

- Participant
- Relative
- Both

Summary- Enhanced consent video

- The SWAT video should be used for ALL eligible participants irrespective of language/ethnicity
- Only UK sites randomised into the enhanced consent process (animated video) will have access to the videos
- A site investigator at your site only needs to log in once to obtain the site specific link, this can then be shared with the team and book marked with no further log in requirements to watch the video
- Please DO NOT share the link with any other sites
- Contact the coordinating center if you need any assistance
